IPL (Intense Pulsed Light) Permanent Hair Reduction

Excess body hair is a common complaint for our male and female clients. Our versatile IPL services provide safe and effective hair reduction or removal for face and body. IPL is the only clinically-proven method of permanent hair reduction and, because it is virtually pain free, it's no surprise that it's our most popular treatment.

We want you to have the best IPL treatment that suits your skin type. That's why our specialists offer two different hair removal solutions and each can be tailored to your individual needs:

This is a truly unique and powerful therapy with often remarkable improvements after one session. Treatment of all ten fingers/toes is recommended to combat spread of fungus.

Fungal Nail Treatment

Skin Rejuvenation

There are many reasons why skin begins to sag and lines form: pregnancy, weight loss, sun exposure and ageing are just some of the causes. The IPL Rejuvenation process uses IPL (Intense Pulse Light) to heat the under-layers of the skin, stimulating the production of collagen which is the substance that keeps the skin firm and supple. More collagen means firmer, smoother skin with a visible reduction in fine lines and wrinkles, particularly on the face, neck and décolletage. Hands, which can age much faster than other parts of the body because of their constant exposure to water and harsh chemicals, can also be rejuvenated to look smoother with a more even skin tone.
